“Post-normal science and its ethical aspects - Doctoral projects and other projects in the making” A new workshop: 2 September – 4 September 2019

Third (revised) circular!

Dear Recipient of this letter,

Your participation is confirmed and this is an update.

As you can see with the above list of participants, there have been several drop-outs. Those who are on the list have confirmed they want to participate, and can come. Unfortunately, we had further drop-outs recently, due to other obligations. The result is a significant reduction in the number of participating PhD students, and significantly less than in recent years. Well, I think this should not stop us! Perhaps this is good opportunity for the senior participants to present some of their basic ideas as a pedagogical help for the students, and for the general discussion.

I have attached a preliminary schedule for the talks. I hope this works for you. This time, the seniors are asked for more input to the general discussions, and present a lecture on basic and helpful insights, as well as a lecture on a topic of their choice. **Let me know if this is too much, or if you have other ideas.** All in all, I think we will have more time for each participant, and we can raise questions and problems which perhaps sometimes are left unanswered or not discussed due to time constraints.

Ulrike can assist you in your travel plans, and she has already done so for some of you. As communicated earlier, if you want her to arrange your travel or have it pre-paid, contact her and discuss this with her.

Those of you who have not yet registered are asked to do this asap! **The registration form was sent to you by Ulrike earlier.**

Again, if you have any questions, do not hesitate to send an email to Matthias Kaiser (matthias.kaiser@svt.uib.no) **and** to our administrative officer Ulrike Horway (ulrike.horway@asfpg.de). In the meantime you may think about what you would like to present.
